

# Sticklers® Outdoor CleanWipes™ Singles

## OVERVIEW

When dampened with the Sticklers® Fiber Optic Splice and Connector Cleaner, each CleanWipes™ Singles will provide the convenient “wet-dry” end-face cleaning which has been shown to deliver improved results. CleanWipes™ Singles are made from a field-proven, lint-free polyester fabric that resists linting and tearing, even on LC end-faces. The wipes contain no cellulose which might contaminate surfaces and no glues that might scratch end-faces. Each wipe can clean up to six connector end-faces.

- High-purity, lint-free dry wipe
- Stays clean and dry until the package is opened
- Designed for use in harsh environments
- Fits in tool kits and pockets
- Technician-friendly
